User-friendly
telecommunications . . .
the meaning is the same in any language.

The latest technology, available to everyone from
individuals to large companies. Providing all the
right connections around the world.

A wide choice of cost-effective services:
transmitting voice, data, text, video and still

images at high speed; linking computers;
providing access to data banks.

Telecottages and teleservices, giving community
access to information technology and
sophisticated communications systems.

Telecommuting, allowing staff to work at home.
A telecommunications infrastructure for the 21st
century, helping develop the economy of the
Highlands and Islands.
